

# MarkSmart™

## Batters Box and Pitchers Mound Foundations will help control the wear & tear areas on your ballfields

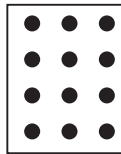

Our MarkSmart™ recycled rubber foundation mats are the cost-efficient alternative to expensive brick & other systems on your ball field. Installing mats 1-2" below grade effectively limits "dig-in", reduces field prep time, eliminates puddling at the plate or on the mound.

Shipped in one carton with Eight 16" x 20" mats per set

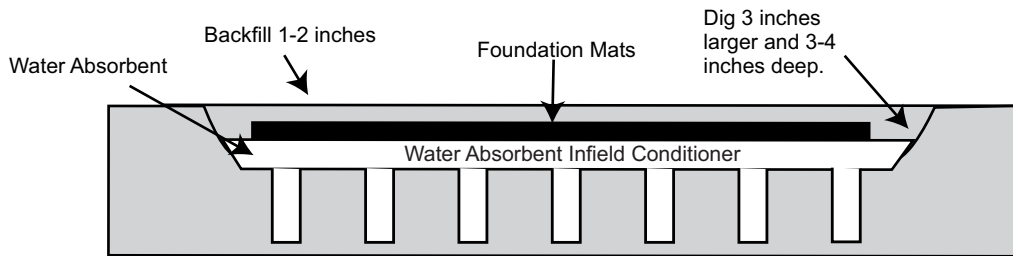

### Easy Installation:

1. Place mats at desired locations.
2. Score an area about 3/4" larger than configured mats.
3. Remove mats and dig out that area about 3"- 4" deep.
4. Re-insert mat, backfill with surface dirt & tamp area.
5. You're ready to play!

### Tip:

After digging the area out and Before installing foundation mats, using a bulb auger (try our **GSA-12**), drill 12 drain holes per mat - approx. 1" dia. x 10" deep Fill holes and 1" of the excavated areas with **water absorbent infield conditioner**

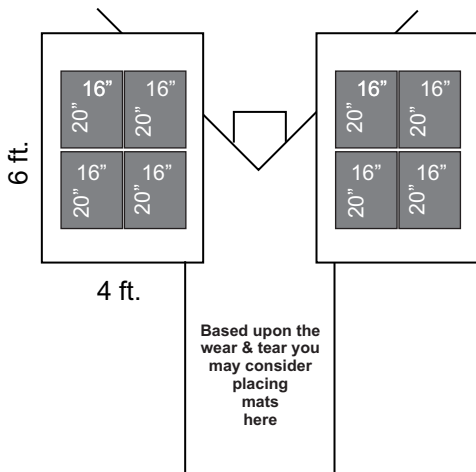

Using our 8 pack sets here are some options for installation

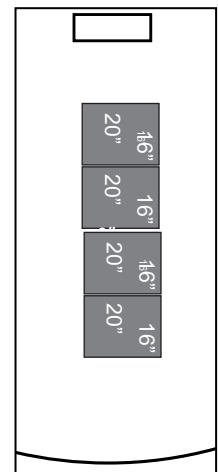

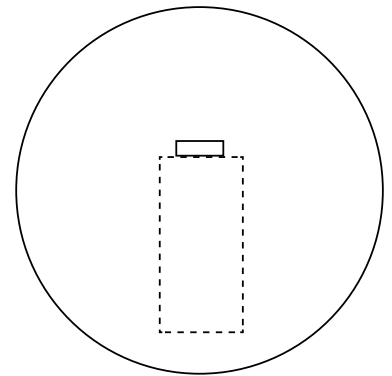

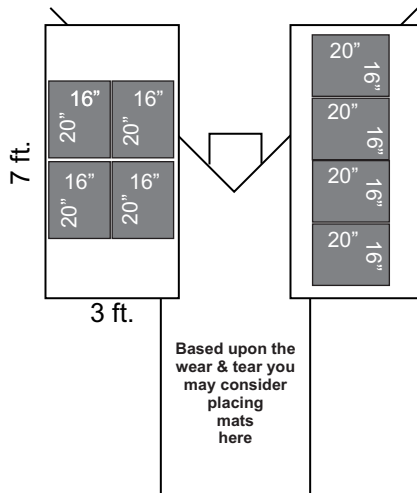

Pitchers mound options

### For All Levels of Play

Spot Coverage - uses mats horizontally  
Full Coverage - uses mats vertically

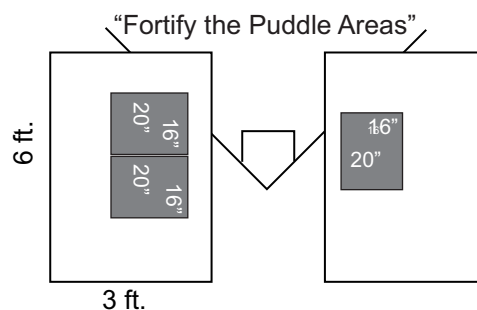

### For Softball (Fast or Slow Pitch)

### Little League Economy Option

Since the wear & tear is mainly a "nervous hole" adjacent to home plate, we suggest the "Economy" option.

Mix & match mats to best fit your needs!
