Dacron Dye Sub, Full Color, Full Bleed Event/Sponsor Flags...

Dacron Flags are excellent for both outdoor & indoor applications. Dacron material is the, "best & most durable flag substrate available for complete & total colorizations for golf and all types of flags". The Dye-Sublimation process, heat sets UV protected inks directly into the Dacron material to achieve exacting imagery and the highest quality print capabilities. This process transforms the white Dacron material into the colors of your design penetrating over 60% of the fiber enabling a reverse image show through resulting in a GREAT looking flag. **#DSFC2014**

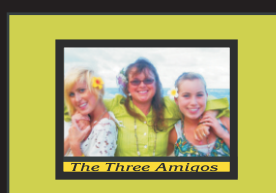

MARKERS, INC. Presents

Dye-Sub Flags for everyday course use - or special events

- Edge-to-edge graphic coverage - any design, including Solids, Checkered, Diagonals and more.
- UV treated inks are heat-set into fabric and provide 98% show through
- High Resolution Graphics with excellent vibrancy
- Unmatched color capability including gradients
- Extra durable 250 denier Dacron polyester fabrics flow with the wind. Extra sturdy stitching with double hems provide added life.
- No Set-Up charges (minimum 9 flags). Even 20 colors - NO PROBLEM.
